

Easy'Up loan

SUBORDINATED LOAN

A loan to boost your innovation project and its implementation on the market

TYPE OF PRODUCT : subordinated loan

RECIPIENT : your company

DEVELOPMENT STAGE : Creation, Growth, Innovation, Transmission

MINIMUM AMOUNT : none

MAXIMUM AMOUNT : up to 40% of the total budget, with a maximum of EUR 500 000 per project

Who is eligible ?

The Easy'Up subordinated loan is intended for any small or medium sized enterprise (SME) in Wallonia conducting what can be broadly described as an innovation project.

This product is intended for:

- small and medium sized enterprises (SMEs) (self-employed persons and companies)
- with a place of business in Wallonia
- who/which are not in financial difficulties
- and operate in an eligible sector.

What is it for ?

The projects funded may include the innovation of a product, service, production process or marketing, with or without a technological component, including the improvement of an existing product, service or process.

Innovative projects must have short-term marketing prospects or already be on the market. In all cases, they must meet a market need.

In the case of an eco-innovative project, i.e. a project having a favourable impact on the environment or the company's carbon balance, an Easy'Green loan is also available.

Duration

Maximum period of 10 years. The repayment of capital may be deferred for the first 2 years in order to improve liquidity during the start-up phase.

Terms

COMPLEMENTARY TO OTHER PUBLIC LOANS

The loan may be granted in tandem with other public financing solutions, with a maximum public intervention ceiling of 75%.

FAST AND SIMPLE PROCEDURE

Applications may be submitted at any time. Prior contact with an advisor is always preferable.

The Investment Committee meets once a month, and an electronic procedure can be organised for any applications requiring consideration.

In the case of a favourable decision, the loan agreement may be signed and the funds provided as soon as any necessary conditions have been met. This method of operation therefore does not involve pre-financing on the part of the company.
